Databases & Search: MySQL, MongoDB, Elasticsearch, heidisql
Backend: REST APIs, Webhooks, Scheduled Jobs, Reporting and Automation
Cloud & Tools: AWS, Git, Linux, HeidiSQL

PROFESSIONAL EXPERIENCE

LegitQuest (AI Legal Tech), New Delhi – Backend Developer (Python, Laravel) | Apr 2025 – Present

- Built litigation management, search, reporting and audit-logging modules on a database of millions of case records using Laravel, Python, Elasticsearch and MongoDB.
- Designed and developed REST APIs for the litigation platform.
- Automated a weekly report of cases across all Indian courts, emailed to a client every Friday at 4 PM via scheduled jobs.
- Built webhooks that push case updates to an enterprise client, and a 15-minute scheduled job that refreshes case suggestions.
- Developed backend features in Python alongside Laravel: scraping, API or report.

Advit Software Solutions (Remote) – Backend Developer Oct 2024 – Mar 2025

- Built e-commerce modules in Laravel: shipping, payment integration and stock management.

Regenapps Clouds Pvt Ltd (Hybrid) – Backend Developer, Contract Feb 2024 – Jul 2024

- Delivered the Sales module of a multi-tenant Vehicle Scrapping System, including user-wise sales reports.
- Contributed to the multi-tenant architecture with senior engineers (Laravel, PostgreSQL).

National Informatics Centre (NIC), Durg – Backend Developer, Contract Dec 2022 – Jan 2024

- Built Public Grievance, Mitan Club and Survey applications with forms and reports for the entire Durg district (Laravel, CodeIgniter, MariaDB).

Proximity IT Solution, Raipur – PHP Developer Jul 2021 – Dec 2022

- Developed PHP/MySQL applications for education, healthcare and e-commerce clients, including an LMS (PHP&Mysql).

Arudantech, Allahabad – PHP Trainee and Computer Lab Instructor Jun 2020 – Jun 2021

- Completed PHP and MySQL training and taught junior as a lab instructor.
